## Joint Venture Agreement of VEPRO AG with a new company „VEPRO Spain“ located in Madrid

VEPRO has been for almost 40 years one of the most experienced and Germany's most innovative eHealth company. With its own software development, the company installs and supports complete IT solutions for these areas: PACS, RIS, Messenger and video conference, referral or patient portals.

Starting July 1, the global partnership of VEPRO AG with a new company „VEPRO Spain“ will be expanded further. VEPRO Spain will be managed by Manuel García Castejón and his experienced team will offer the entire VEPRO product range exclusively in Spain, Mexico, Colombia, Ecuador, Peru and Chile.

In addition to the high quality and stable performance of our products, we consider proximity to our customers essential to ensure effective support and assistance to meet the local and individual requirements of each market.

---

**„VEPRO AG is looking forward to the new global partnership and cooperate with an experienced team all over the world.“**
