VEPRO eHEALTH Solutions

Arab Health

By Informa Markets

We thank all visitors for the successful Arab Health 2020 in Dubai

We would like to thank the numerous visitors who received the new innovative, as well as the well-known and proven products from VEPRO live during the medical show.

CRYPE - Communication with Privacy

Our new communication app CRYPE paid special attention to visitors. It was another highlight of our stand for doctor-patient communication and provided a lot of interested talks. We are happy to take the positive feedback with us to Germany.

Around 80,000 visitors from 66 countries visited the medical exhibition in Dubai. The VEPRO team recorded a lively exchange with many new contacts and interesting projects with partners and customers from North Africa and the Middle East.

PACS and RIS in the CLOUD

Access to medical images and reports - from any location - at any time to ensure the best possible service for patients was one of the most common tasks for visitors. With the WEBstudio in-house or data center cloud solution, the implementation was impressively shown to customers.
